

FamilyTree**DNA**  
**Certificate – Haplogroup**

Family Tree DNA certifies that a DNA sample from

**Mr. Maurice Bedard Jr.**

**Sample # E14536**

was analyzed for Haplogroup determination using the Single Nucleotide Polymorphism test. The analysis shows that you are positive for the following SNPs: **M123+**; and negative for the following SNPs: **M290- M136-**. According to the current classification, you have been assigned to:

**Haplogroup E1b1b1c**

This branch likely originated in western Asia, and some of its lineages then migrated into eastern Africa, possibly through the Nile River corridor, and into the Near East. E1b1b1c is currently found in the Near East, North Africa, and some of Europe, and has a significant presence in Jewish lineages.
